ORONO HIGH SCHOOL

The sport of football is so much more than its aggressive stereotype. It is full of vulnerable moments and passion for what we love. We don't play for ourselves; we play for Orono.

Griffin Reiner (12)

From the outside looking in, peering through the windows, you see a typical high school stairwell. 90 stairs from top to bottom. Students progressing up on the right and down on the left. Posters hanging on the walls.

But until you take a step inside, until you transport through those windows – you don't truly understand the Orono experience.

On the inside, we see a high school that winds together during break, when masses gather to get their morning Celsius at the student store. We see each individual student traveling through their highs and lows. We see stories hidden beneath the surface of eager freshmen waiting their turn to sit on the senior benches. We see the building of futures and the making of memories.

You see an A on the star student's paper. But you don't see the hours of studying they put in the night before. You see the spotlight shine on the lead of the musical. But you don't see the tech crew at work in the soundbooth. You see your soft-spoken classmate keeping to themselves. But you don't see their talkative side come out around their friends

There's a different angle to every story. That's how we see it...
